CDC Vantta Canada Western Amber Durum

Progress Through Research
Le progrès grâce à la recherche

Description:

CDC Vantta is a semi-dwarf, hollow stem durum, with dark black awns, excellent grain yield potential and very strong straw. CDC Vantta has high yellow grain pigment and superior pasta colour giving it excellent end-use suitability. CDC Vantta also has low cadmium, high falling number and strong gluten strength. CDC Vantta should be a good fit in all durum growing areas of western Canada.

Parentage: D06.76.042/D05.15.089

Strengths:

- 10% higher yield than AC Navigator and 4% higher grain yield than AC[®] Strongfield in Coop registration trials
- Semi-dwarf, 1 cm taller than AC Navigator and 10 cm shorter than AC[®] Strongfield
- Very good lodging tolerance, similar to Brigade
- Very high gluten strength, index of 97%
- High falling # of 510 compared to 388 for AC[®] Strongfield and 462 for AC Navigator
- Rated resistant to leaf rust, stripe rust and bunt

Neutral Traits:

- Rated intermediate resistance to stem rust

Weaknesses:

- Late maturity, +2 days compared to AC Navigator and +4 days compared to AC[®] Strongfield
- Rated moderately susceptible to FHB

Breeder:
